Arkitekt Waterfree Urinal

Zero water consumption in the urinal

Vitra, with its innovative approach of designing every single detail with high-tech solutions, has created a Zero Water Consumption Urinal thanks to its special cartridge.

Non-splash technology Waterfree Urinal works with a built-in removable special cartridge. During the process, urine is filtered by a special liquid in the cartridge and directly transferred to the sewer system which eliminates disturbing odors caused by urine itself or the sewer system.

Waterfree Urinal creates hygiene and 100% water conservation in high-traffic restrooms.

| Code | Description | EXW EURO / pcs. |
|---------------|---|-----------------|
| 4419B003-7200 | Waterfree Urinal, cartridge is included | 495 |

| | | |
|--------|-----------|----|
| 424050 | Cartridge | 75 |
|--------|-----------|----|

A special cartridge life-indicator is provided with the product. The easy removable urinal cartridge should be replaced after approximately 7000 usage.

- We reserve the right to make technical modifications and alter colours without prior notice.
- 10 years warranty is offered for ceramic sanitaryware products
